

Kingsway Technology keep DHM Healthy

About Douglass Hanly Moir Pathology

Douglass Hanly Moir Pathology is a respected, well established pathology practice. They are medically managed by pathologists and a select and highly qualified team of scientific and administrative staff.

Douglass Hanly Moir Pathology was formed in 1996 from the amalgamation of two like-minded pathology practices; Douglass Laboratories and Hanly Moir Pathology. Douglass Laboratories had been operating in Sydney and country NSW areas since 1971. Hanly Moir Pathology, which formed in 1987, had its origins in several long-established Sydney practices.

How we made their day

Douglass Hanly Moir have enjoyed our personalised service and pay per print model.

Printers have been deployed Australia Wide with specific software setups for the customers VIPP based systems to ensure correct tray setups and media handling.

Print cost analysis is handed by Kingsway Technology and Douglass Hanly Moir are billed each month for what they print only.

Not tying up working capital on printing equipment , so this budget capital can be used for other essential purchases.

The Outcome

Douglass Hanly Moirs' printing needs have been met, which is of the highest importance. They work they do could save lives. Therefore downtime is not an option.

We also have backup printers that can be shipped immediately to site where required. The end users simply log the issue through their help desk and we respond accordingly. We phone fix where we can and attend site where we can't.

How we made it work

Kingsway Technology have ensured smooth, fast and accurate printing for the last three years.

Ensuring a minimum of downtime and a maximum of efficiency and support.
